

KONSTANTINOS LARKOU

[GitHub](#) | [LinkedIn](#)

Software Engineer with hands-on experience building data-driven applications and production web platforms using Python (FastAPI), SQL, and Vue.js. Experienced in full-stack development, automation workflows, machine learning projects, and data analysis across backend, frontend, database, and Linux environments.

EDUCATION

University of Cyprus, BSc in Computer Science

Sep 2019 – May 2023

Overall Grade: Excellent (8.62 / 10).

University of Cyprus, MSc in Computer Science

Sep 2025 – May 2026

Current Grade: Excellent (8.33 / 10), recipient of the Michalis Polydorou Memorial Scholarship.

SKILLS

Languages: Python, SQL, JavaScript

Backend: FastAPI, SQLAlchemy, REST APIs

Frontend: Vue.js

Databases: MySQL

Data & Machine Learning: pandas, NumPy, scikit-learn, feature engineering, model evaluation, EDA

Infrastructure & Tools: Git, Linux, Nginx, systemd, Jupyter

EXPERIENCE

Full-Stack Developer, SEiT Lab, University of Cyprus

August 2024 – Present

- Contributed across frontend, backend, database, and deployment layers for a production research platform.
- Developed and maintained frontend features using Vue.js and backend services using FastAPI, SQLAlchemy, and MySQL.
- Designed REST APIs, authentication flows, scheduled jobs, and relational database schemas.
- Managed Linux deployments on Rocky Linux servers, including Nginx reverse proxy configuration, systemd services, backups, and operational maintenance.
- Automated deployment and release workflows for frontend and backend services within the university DMZ.
- Integrated external and AI-related services into internal platform workflows.

PwC Cyprus, Information Security Auditor

Jul 2023 – July 2024

- Assessed information systems and data flows to evaluate risks and control effectiveness.
- Evaluated operational processes and security controls to identify inefficiencies.
- Presented findings and recommendations to stakeholders through structured reports and presentations.

AMDOCS, Software Engineer, Summer Intern

Jun 2022 – Sep 2022

- Contributed on a full-stack project using ASP.NET, Angular, and Oracle DB.
- Developed features for a RESTful application following an MVC architecture.

AC Goldman Solutions & Services, Summer Intern

Jun 2022 – Aug 2022

- Built Python-based data collection pipelines to extract and structure large volumes of social-platform data.
- Used Selenium, BeautifulSoup, and pandas to clean and prepare data for analysis.

KONSTANTINOS LARKOU

[GitHub](#) | [LinkedIn](#)

KIOS Research Centre, Project Support Scientist, University of Cyprus

Dec 2020 – May 2021

- Developed interactive geospatial visualizations using Mapbox GL JS to display buildings, road networks, and terrain contour data in a web interface.
- Integrated GeoJSON and Mapbox terrain data to support feature exploration, coordinate-based search, and interactive map navigation.

PROJECTS

Stroke Risk Prediction with Machine Learning

- Built an end-to-end machine learning pipeline to predict stroke risk using real-world healthcare datasets.
- Performed data cleaning, feature engineering, and exploratory data analysis using pandas and scikit-learn.
- Trained and evaluated classification models including logistic regression and tree-based algorithms.
- Analyzed feature importance and model performance to identify key stroke risk factors.

IoT / Telemetry Data Analysis & Machine Learning

- Analyzed telemetry data to identify behavioral patterns and support targeted advertising strategies.
- Built Python-based data processing pipelines and conducted exploratory analysis on telemetry datasets.
- Applied machine learning techniques for user prediction and segmentation tasks.
- Visualized analytical insights to support data-driven decision making
